GARLINGHOUSE ALL-AMERICAN HOMES

The plans shown in this book represent only a fraction of the total number of designs which are available to you. We have 22 different plan books listed on the back cover of this book and in them are more than 1,200 designs from which you may choose the one you wish to build.

Analyze Your Needs Before You Build

To decide what you want is the first step in building your home. The house design you choose will effect your daily life and that of your family for many years to come. Thus it is important that you consider carefully just how much house you need for your family's activities including recreation, sleeping, preparation and eating of food, entertaining, work and the hobbies enjoyed by members of your household.

In short, try to select a home that will "take" and "provide" a lot of living. If you have hobbies, plan a room or space for them. Sometimes a garage workshop will suffice, or a corner of the basement, but the principal thing to try for is a separate space for hobbies. If you like to spend a lot of time outdoors, plan your home and garden as a unit for outdoor dining and relaxation. When there are children, a basement recreation room is extremely desirable.

Consider Resale Value

There is one more thing which should be remembered and that is, although you are choosing a home for yourself, it is wise to consider resale possibilities in case you wish to sell your property at some future date. In this respect a simple attractive house, built with care and attention is your best investment in service, satisfaction and salability.

Each year that you live in your home will see new touches, improvements, changes in furniture arrangements. As your personality grows and your activities increase, new thoughts and ideas will be born. If your home is well designed, all these new ideas can be incorporated into it. A real home, housing an active and imaginative family never stops growing and that is part of the satisfaction and happiness derived from owning your own home.

Comfort and Utility

Since building a house involves a major investment, it demands careful planning. You will want a home designed for comfortable living in all kinds of weather. You will want a practical home; one that utilizes all available space to the best possible advantages.

Garlinghouse designs are distinctive and have individuality. The photographs show how the house will appear after construction and the floor plans show the arrangement of rooms and their sizes. Designers and builders, with many years experience helping people build homes at maximum quality and minimum expense, have prepared a detailed plan for each of the designs shown in our plan books.

Order Your Plans This Simple, Easy Way!

We have available to you the complete working plans, specifications, lumber and mill lists for the designs shown in this book and all of our other books (listed on the back cover) at the prices listed with the design (\$7.50 to \$25 per set). Your plans will be in the mail within 24 hours after we receive your order. Here's what you get:

PLANS—The complete working plans consist of blue prints of all four elevations, basement and all floor plans and details showing built-in features and intricate parts, all drawn to a scale of not less than one-fourth inch to one foot. Also, a plot plan in blank to be filled in locally.

SPECIFICATIONS—The specifications explain in detail the

construction of the house from the excavation to the interior decoration.

LUMBER AND MILL LISTS—The lumber and mill lists consist of an itemized list of lumber and mill materials needed to construct the building and state where each item should be used.

No. 7014—A lovely little Colonial cottage, small and attractive, is economical to build and very livable. There are five rooms, bath, six closets, and a double garage. The stairs from the hall lead up to a large storage attic, and the other stairs lead to a full basement. In the basement are a recreation room, lavatory, laundry, furnace room, and storage space. The foundation is concrete and the house is frame veneered with brick painted white. The

roof may be either wood or composition shingles.

No. 4619—This home has two fireplaces; one in the living room and one in the basement game room. A carefully-planned kitchen “workshop” for less formal living, dining room, study, three bedrooms, 8 closets, linen cabinet, bath, and the screened porch just off the living room complete the main floor plan. A large storage attic is reached by the stairs from the dining room and the stairs from the entry lead to a full basement where a large recreation room, lavatory and furnace, laundry and storage rooms are located.

COMPLETE PLANS

A SET OF GARLINGHOUSE PLANS INCLUDES—

PLANS—The complete working plans consist of blue prints of four elevations, showing how the house will appear on all four sides. A plot plan locating the house on the plot of ground, with dimensions in blank to be filled in locally. A basement plan, (in cases where house does not have a basement, a foundation plan is provided), showing the materials, height and thickness of the walls and footings, and location of flues, cross walls, I beams, heating plant, etc. Floor plan showing the arrangement and dimensions of rooms, closets, bath, etc. On the floor plan is also shown the location of electric outlets, plumbing fixtures, heat registers, built-in cupboards, medicine cabinets, linen cabinets, range and refrigerator space, etc. The detail sheet shows suggested details for the built-in features, the type of interior finish, style of doors, etc., and a section showing the construction of the building.

SPECIFICATIONS—The specifications explain in detail the construction of the house from the excavation to the interior decorations.

LUMBER AND MILL LISTS—The lumber and mill lists consist of an itemized list of the lumber and mill materials needed to construct the building and stating where the items should be used.

THE PLANS, SPECIFICATIONS, LUMBER AND MILL LISTS
as we have them made up for the designs in our books are
sufficient and further details are not needed by any com-
petent builder.

MINOR ALTERATIONS CAN BE MADE BY BUILDERS—It is impractical to change our tracings to show alterations, but minor alterations in design, material substitutions, etc., can be made by any competent builder without going to the expense of making special plans, which usually cost several times the price of our stock plans.

TO OBTAIN COST ESTIMATES—An estimate of what it will cost to erect any house illustrated in any of our books, in your locality, may be obtained by consulting your local builder.

ALL PLANS SENT ON MONEY BACK GUARANTEE—All Garlinghouse Plans are sent on a "Money Back If You're Not Satisfied" Guarantee. You have five full days after receiving the plans to study them over and to decide if they will serve your purpose. Plans which are not satisfactory may be returned for prompt exchange or refund.
